

EVOLAS

LASER-Crafted Art

Where light ignites matter.

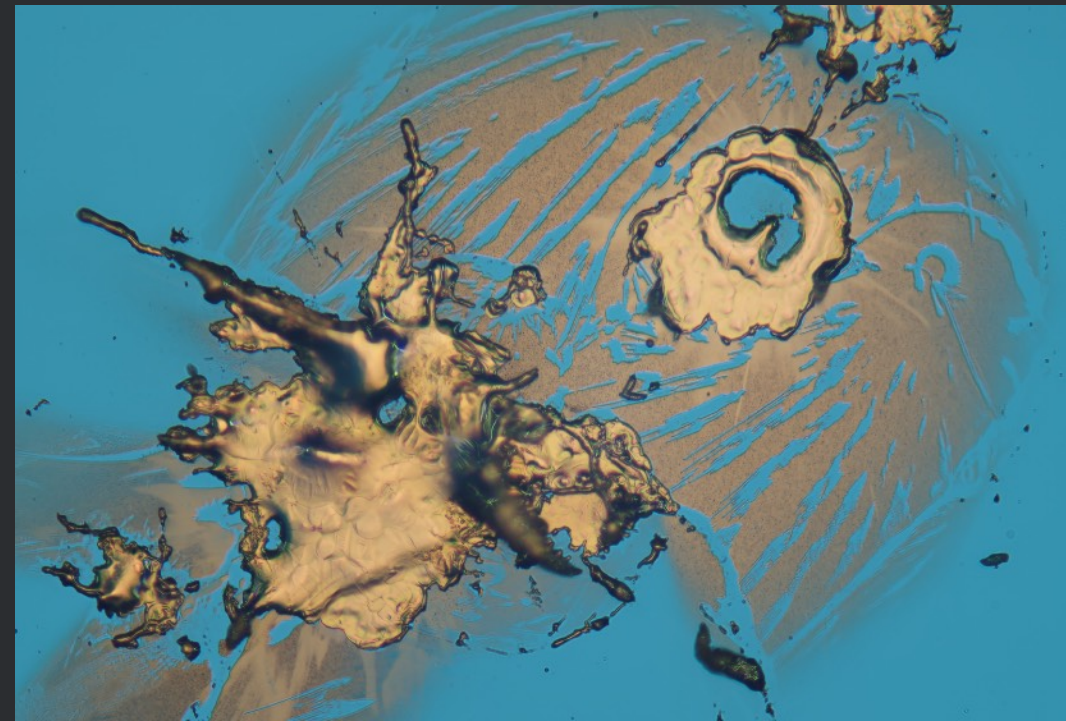

And matter becomes art.

Exclusive Motifs on EVOLAS GLOBE EG-00220-46008

About This Gallery

Main EVOLAS Motif:

ARTWORK NAME: “Field of Confluence”
 MOTIF ID: EM-P-00158-46167
 GLOBE ID: EG-00220-46008
 EDITION: 5

This preview presents the additional motifs associated with the main artwork “Field of Confluence” on EVOLAS GLOBE EG-00220-46008.

All motifs shown here originate from distinct regions, structural conditions, and perceptual configurations within the finite material landscape permanently preserved on this GLOBE.

The main artwork represents a carefully selected visual configuration within this landscape. The additional motifs extend this perceptual environment through further structural variations, material fields, and spatial viewpoints emerging from the same irreversible physical reality.

GLOBE 6 was created exclusively with brass. Its material landscape contains both intense core regions shaped by high-energy laser-induced material interaction and more peripheral deposition fields characterized by separated brass structures, field-like reaction residues, and directional traces.

The motifs were identified, selected, and artistically articulated through microscopic exploration using controlled optical conditions, selected focal planes, and varying magnification levels.

For this GLOBE, 5×, 10×, and 20× microscope objectives were used to reveal different perceptual scales within the same physical material landscape — from broader structural fields to highly localized formations and relational configurations.

The resulting differences in scale, spatial depth, structure, illumination behavior, and color appearance form an intentional part of the perceptual diversity contained within the same physical GLOBE.

The motifs presented in this gallery include isolated structural formations, dense material fields, peripheral deposition zones, and configurations in which separated brass structures appear visually connected by surrounding reaction residues.

Differences between the motifs arise from variations in structure, density, dispersion, spatial orientation, magnification, focal depth, and framing rather than from changes in the underlying artistic principle.

Each image represents a consciously chosen viewpoint within the same irreversible material landscape, either by selecting a distinct region or by altering the perceptual focus within a shared spatial configuration.

All motifs shown in this gallery are intrinsically linked to a specific EVOLAS GLOBE and to the permanent microscopic metal structures preserved on and within its glass body — the irreversible material outcome of complex laser-driven interactions between light, metal, and glass.

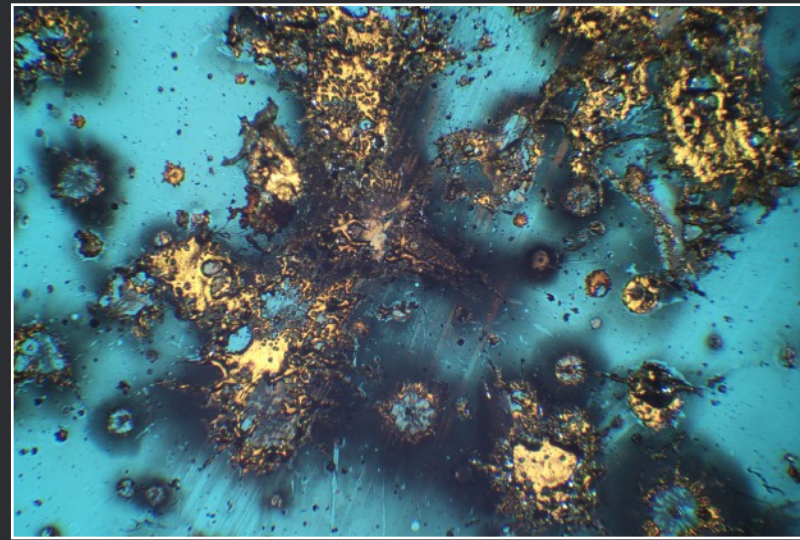

The additional motifs are not freely available as independent works outside their defined relationship to the main artwork. Access to the acquisition of any additional motif is exclusively reserved for collectors who have acquired the corresponding main artwork derived from the same GLOBE.

Each additional motif therefore constitutes an exclusive extension of that specific artwork and cannot be obtained outside this defined relationship.

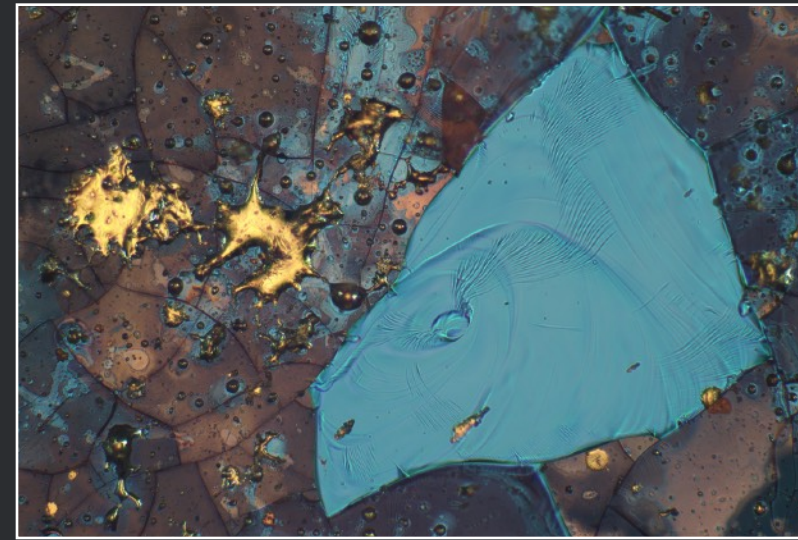

This Preview Gallery presents the complete set of additional motifs together with their individual EVOLAS codes, providing a structured overview of the visual possibilities contained within a single GLOBE.

EVOLAS

LASER-Crafted Art

Each motif presented in this gallery represents a distinct perspective derived from the same physical GLOBE — a permanent material record formed through irreversible laser-driven material interactions.

Together, the motifs form a coherent landscape of views and interpretations. None of them alters the underlying work; each reveals a different position within the same physical reality.

This Preview Gallery provides an overview of the visual possibilities contained within a single EVOLAS GLOBE and serves as a reference for further exploration. It applies equally to all officially issued edition instances of the main artwork derived from it. Individual ownership and edition numbers are defined exclusively in the respective Certificates of Authenticity.
