

EVOLAS

LASER-Crafted Art

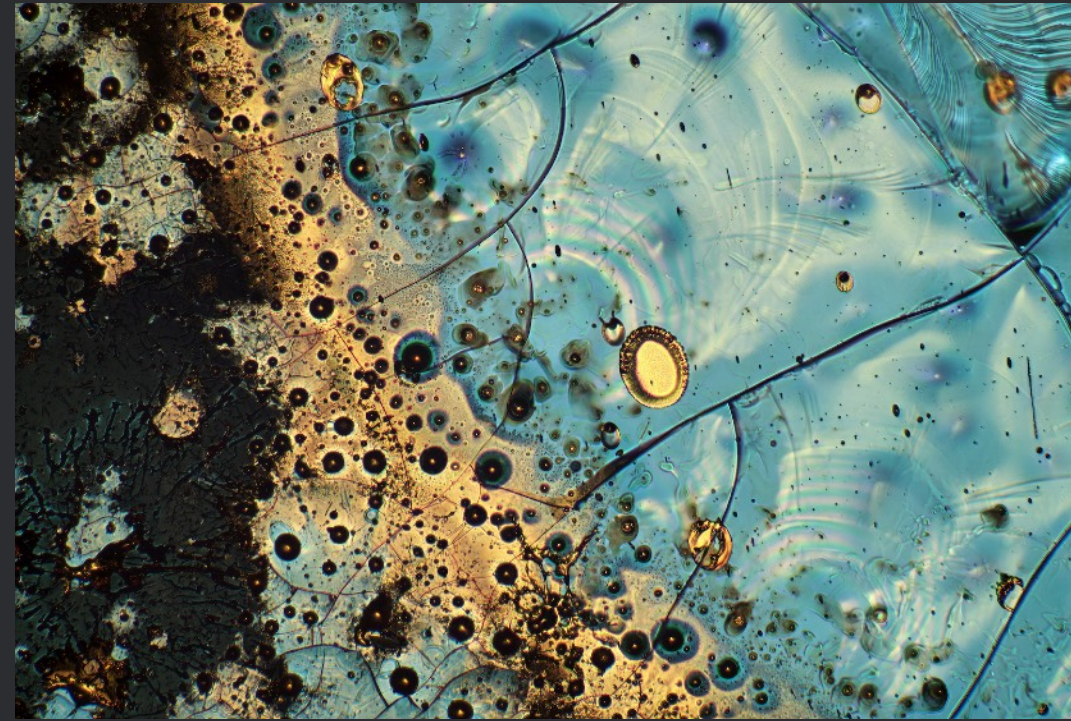

Where light ignites matter.

And matter becomes art.

Exclusive Motifs on EVOLAS GLOBE EG-00224-46008

About This Gallery

Primary EVOLAS Motif:

ARTWORK NAME: "Place of Transition"
MOTIF ID: EM G-00027-46031
GLOBE ID: EG-00224-46008
EDITION: 5

This preview presents additional motifs that exist on the same EVOLAS GLOBE as the main artwork Place of Transition. All motifs shown here originate from distinct regions of a single, continuous microscopic metal landscape permanently preserved on this GLOBE.

The main artwork represents a carefully selected reference point within this landscape. The additional motifs do not constitute separate or independent works; instead, they reveal further perspectives, structural variations, and spatial conditions emerging from the same physical material reality.

All motifs were identified, selected, and artistically articulated under identical microscopic and optical conditions. While sharing the same physical origin, each motif reflects a distinct curatorial and compositional decision within the same material landscape.

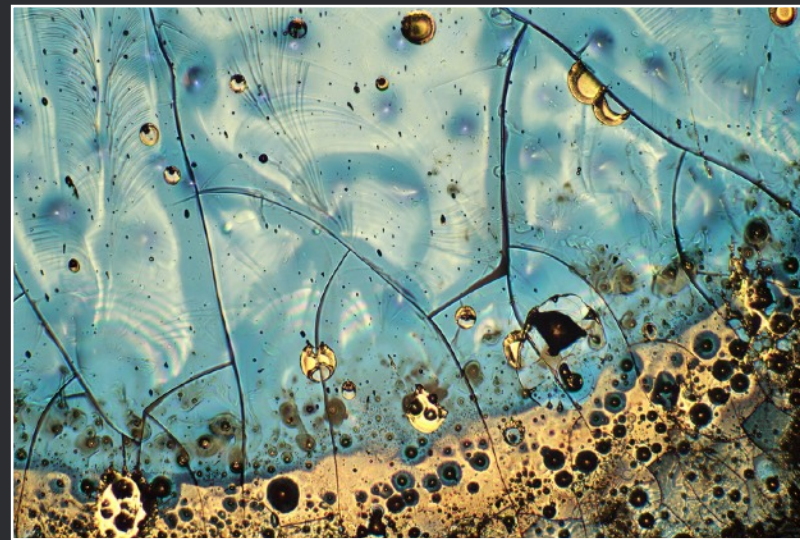

Differences between the motifs arise from variations in structure, density, dispersion, and spatial orientation rather than from changes in process or technique.

Access to the acquisition of any additional motif is exclusively reserved for collectors who have acquired the corresponding main artwork derived from this GLOBE. Each additional motif therefore constitutes an extension of that specific artwork and cannot be obtained outside this defined relationship.

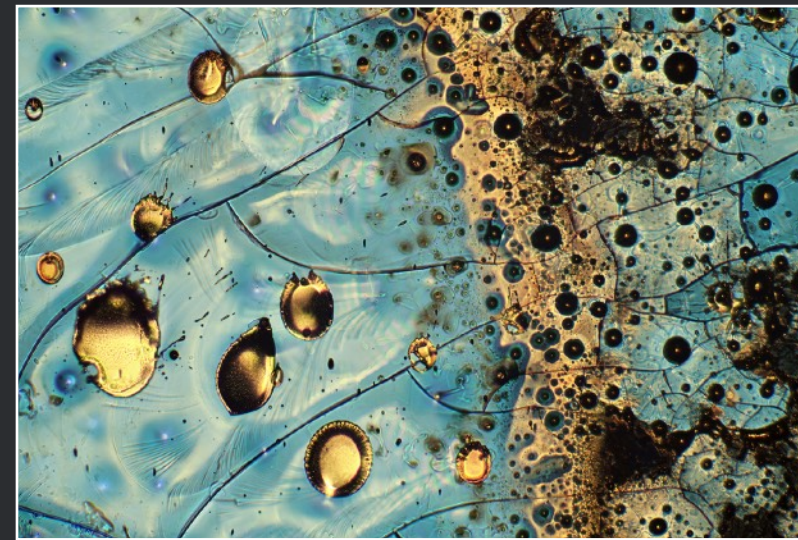

This preview gallery presents the complete set of additional motifs together with their individual EVOLAS codes, providing a structured overview of the visual possibilities contained within a single GLOBE

EVOLAS

LASER-Crafted Art

Each motif presented in this gallery represents a distinct perspective derived from the same physical GLOBE — a permanent material record of a single, irreversible laser-driven process.

Together, the motifs form a coherent landscape of views and interpretations. None of them alters the underlying work; each repositions the viewpoint within a shared physical reality.

This Preview Gallery provides an overview of the visual possibilities contained within one EVOLAS GLOBE and serves as a reference for further exploration of its motifs.
