Artwork

Artwork Title:	Emergence in Cellular Green
EVOLAS Motif ID:	EM-P-00202-45803
Edition:	3
Motif Creation Date:	May 26, 2026

Origin

Associated GLOBE ID:	EG-00222-46008
GLOBE Production Date:	December 17, 2025
Dimension of visible image section:	661 μm $\times$ 443 μm
NFT ID:	assigned upon acquisition

This artwork is a curated microscopic view extracted from a singular physical GLOBE.

Artist's Interpretation

A cellular field opens in green.

Dark.

Dense.

Alive with hidden order.

Across it,
rounded forms rest in silence.

Closed bodies.

Still bodies.

As if holding something
that has not yet chosen
to appear.

Between them,
fine structures spread
like veins,
like leaves,
like cells
remembering the shape of growth.

Near the center,
a silver form breaks into light.

Not placed there.

Not separate.

It seems to have come from within
the dark body behind it,

leaving the impression
of a shell,
a vessel,
a first boundary crossed.

The surrounding field receives it.

The green does not remain background.
It becomes origin.

A place of formation.

A place of release.

What appears here
is not an object alone,
but a moment.

The moment when something concealed
becomes visible.

When a closed form opens.

When matter begins
to resemble becoming.

The dark bodies remain.

The silver form has emerged.

And the field around it
holds the trace
of that first appearance.

Contextual Closure

Emergence in Cellular Green exists as a singular, non-reproducible motif physically originating from a microscopic metal landscape formed through laser-induced material interaction on and within its corresponding EVOLAS GLOBE.

The structure captured in this artwork is not constructed, simulated, or digitally generated. It represents the irreversible material outcome of high-energy interactions between light, metal, and glass, shaped by material ejection, deposition, thermo-chemical reaction processes, and the formation of field-like reaction residues — observed and artistically revealed through microscopic exploration.

Unlike motifs defined primarily by a single dominant material body, *Emergence in Cellular Green* derives its visual character from the interaction between rounded aluminum structures and an extensive network of thin reaction layers. Under the selected optical configuration, these interconnected structures create the appearance of a cellular landscape in which individual forms remain embedded within a continuous surrounding field.

The visual presence of the work emerges from the contrast between its inorganic physical origin and its organic visual appearance. The rounded bodies remain physically separate, while the surrounding reaction layers establish the impression of continuity across the microscopic landscape.

In addition to the main motif presented here, the same GLOBE contains a limited number of further distinct motifs. These additional motifs were identified within adjacent or structurally related regions of the same physical material landscape and have been individually selected and artistically articulated.

Together, they form a coherent set of visual configurations derived from a single physical origin, without implying hierarchy or narrative sequence.

Collectors who acquire *Emergence in Cellular Green* obtain exclusive access rights to these additional motifs associated with the same GLOBE. Details on these motifs are documented separately in the corresponding Preview Gallery.

The acquisition of this artwork encompasses the associated digital image file, NFT registration, documentation, and a defined ownership relationship to the underlying physical GLOBE from which the motif materially originates. The exact

scope of this relationship is defined in the corresponding Certificate of Authenticity and applicable edition documentation.

This ensures that the artwork remains permanently linked to its physical source and documented material reality.

Further material and process information is provided through the associated EVOLAS Creation Dossier and via the EVOLAS website.

This Artwork Statement applies uniformly to all officially issued edition instances of *Emergence in Cellular Green*. Individual edition identifiers, cryptographic integrity references, and ownership documentation are defined exclusively within the corresponding Certificate of Authenticity.
